## SPECIAL PRICE BULLETIN

January 6, 1950

Extremely adverse weather conditions throughout the Mississippi Valley Area during the past harvesting season have made it necessary for us to offer for sale seed which will run below the standard of 80% germination. The Mississippi Seed Improvement Association, recognizing the seriousness, has authorized the sale of seed running as low as 60%.

Inasmuch as our price was based on germination of 80% or better, we are offering the following discounts on sub-standard seed:

- 75% Germination - \$ 7.50 per ton off regular price (37½¢ per bag)
- 70% Germination - \$15.00 per ton off regular price (75 ¢ per bag)
- 65% Germination - \$22.50 per ton off regular price (\$1.12 per bag)
- 60% Germination - \$30.00 per ton off regular price (\$1.50 per bag)

Discounts for sub-standard seed will not affect discounts for early payment or early delivery which will remain as previously outlined.

STONEVILLE PEDIGREED SEED COMPANY, Inc.

Stoneville, Miss.

P. S. Storage space limitations make it impossible for us to process and store all seed and pick lots for shipment. Consequently, our only alternative is to ask you to take delivery of your seed based on preliminary germination reports. As soon as final reports are available, any necessary adjustments will be made as outlined above. Any credit issued may be taken in cash or applied against additional seed, which we are attempting to make available for those of our customers who may receive seed of sub-standard germination.
